**Fasson®  
Fasclear 300  
A transparent satin  
finished co-extruded  
polyolefin film**

## Applications

## Key Features

- > Adhesive is specifically designed to exhibit excellent wet-out characteristics on clear films
- > The specially engineered film combines good MD rigidity, and hence dispensability, with high CD squeezability
- > The transparent finished film gives good blend into today's matte plastic containers, without the need for color matching

### Facestock

A transparent satin finished co-extruded polyolefin film, optimally designed for roll label use.

Basis Weight: 71 g/m<sup>2</sup> ± 10% ISO536  
Caliper: 0.076 mm ± 10% ISO534

### Adhesive

A general purpose permanent, acrylic based adhesive.

### Liner

A super calendared white glassine paper with excellent roll label converting properties.

Basis Weight: 60 g/m<sup>2</sup> ± 10% ISO536  
Caliper: 0.051mm ± 10% ISO534

### Performance data

loop Tack (st,st)-FTM 9: 10.0  
20 min 90° Peel (st,st)-FTM 2: 5.5  
24 hour 90° Peel (st,st)-FTM 2: 7.0  
Minimum Application Temperature: -5°C  
After labeling 24H, Service Temperature Range: -29°C~+93°C

### Adhesive Performance

It is a clear permanent adhesive designed for prime labeling applications including squeezable and clear labeling applications. It features good die cutting and strip performance. It is suitable for applications where compliance with FDA 175.105 is required. This section covers applications where for indirect or incidental contact food, cosmetic or drug products.

### Applications and use

Applications are predominantly in cosmetics and toiletries: areas requiring high quality graphics together with consistent functional performance during automatic application and in end use. The specially engineered film combines good MD rigidity, and hence dispensability, with high CD squeezability, for use on containers where continued flexing during end use is expected. The clear finished film gives good blend into today's clear plastic containers, without the need for color matching. Material is a good alternative in those application areas where PVC is no longer accepted.

The above does not represent any guarantee or warranty and the Purchaser must independently determine the suitability of the products for the Purchaser's purposes.

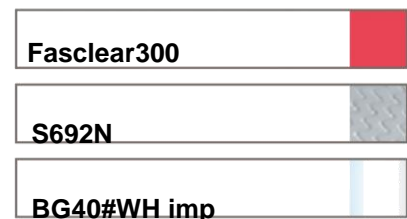

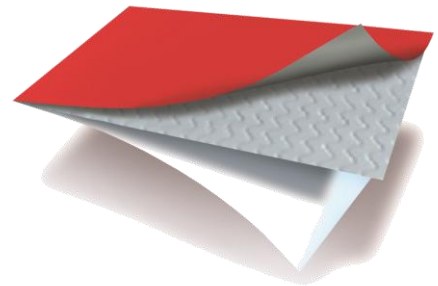

### Conversion/printing

Printable by web screen, letterpress, flexo, gravure, hot foil. Printing in the flexo and letterpress, UV inks are recommended. To ensure optimum wettability and ink bond, additional in-line corona treatment is required. Ink testing is necessary before production. Sharp film tooling preferably in flat-bed, are important to ensure smooth conversion. Need avoid too much re-winding tension to causing bleeding on standard web-fed presses using typical film tooling. Flat bed performance is good while solid and magnetic rotary dies need additional care.

### Shelf life

One year when stored at 23 ± 2°C at 50 ± 5% RH.
